

NEOSPIRE MANAGED HOSTING ACHIEVES SAS 70 TYPE II CERTIFICATION

Displaying commitment to provide the highest level of security and reliability to customers

February 8, 2008 - Dallas, TX -

February 5, 2008 – Dallas, TX - NeoSpire, Inc., a provider of mission critical managed hosting; today announced it has completed the Statement on Auditing Standards No. 70 (SAS 70), Type II certification, performed by independent auditors, KBA Group LLP.

The SAS 70 Type II certification is an internationally recognized auditing standard developed by the American Institute of Certified Public Accountants. A SAS 70 Type II examination signifies that an independent accounting and auditing firm has examined a service organization's control objectives and control activities.

Under Section 404 of Sarbanes-Oxley Act (SOX), most companies require a SAS 70 Type II certification report from their service providers to evaluate controls, data centers, security, backup and system availability. NeoSpire's SAS 70 Type II certification permits the company to deliver confirmation of the controls required for compliance with the Sarbanes-Oxley Act.

"Achieving the SAS 70 Type II certification further demonstrates our commitment to providing the highest level of mission critical managed hosting," said Mitch Gervis, NeoSpire's President and CEO "Such an achievement allows NeoSpire to maintain a secure and compliant environment for our customers."
